

RESPONSIBILITIES

Due Date: Phase 5 - April 10th, 2020

- ✓ Create skeleton classes and begin the implementation of the project design.
- ✓ Create a software test plan. Document the proposed test cases. Ultimately, plan out the project test suite. Begin coding Junit tests.
- ✓ Begin planning and creating prototypes.
- ✓ All of your team's work should be shared using GitHub. All of your work should be done using Git.

Each team member will submit the following deliverables:

- ✓ Each team member should submit your own unique project status report.
- ✓ Submit your current git logs.
- ✓ Provide the link to your current project GitHub repo.
- ✓ Give the names of all members of your team.

ROLES

Melinda - Database / assistance with front end and back end -> all-around code management

Sitara - Classes / Objects (making sure all the object content is correct)

Mazie Xylyn - Front End / GUI / UI work / simulated objects (video game names, details, pricing, etc) / general code editing
